EXPERIENCE

Vaulta | Co-Founder & Software Engineer

Mar 2026 - Present

- Shape project scope, technical approach and delivery priorities while collaborating with creative and marketing teams across branding, content, social media and paid advertising initiatives.
- Led the design, development and delivery of 4 responsive client websites using React, Next.js, TypeScript and Tailwind CSS, translating brand and campaign objectives into conversion-focused experiences.
- Co-founded a digital marketing and technology company, leading technical delivery across client engagements from requirements and solution design through development, deployment and maintenance.

eTranzact International PLC | Software Developer Intern - Backend Team

May 2024 - Oct 2024

- Collaborated in a 3-person development team to implement API specifications in Java, translating documented request and response requirements into application functionality for users and client systems.
- Implemented Swagger UI for API documentation, wrote Java unit tests and contributed to integrating Spring Security into a company application.

PROJECTS

Babcock University Operations Platform | Next.js, TypeScript, PostgreSQL, Prisma, DigitalOcean | Ongoing

- Engineered a centralized operations platform spanning 7 Babcock University business units, with functional workflows for requisitions, procurement, inventory, replenishment and production planning.
- Act as sole software engineer in a 2-person project team, presenting multiple demos and iterating requirements with stakeholders as the platform progresses toward final delivery.

NYSC NIN Submission Platform | React, Vite, NestJS, Prisma, PostgreSQL, Redis/BullMQ, S3/R2

- Developed and deployed the frontend of a live NYSC NIN submission platform supporting registration workflows across Lagos and Ondo, processing 2,262+ submissions; contributed to backend development within a 2-person engineering team.
- Partnered with a backend engineer to automate 3 previously manual preparation steps: file renaming, PDF conversion and compression, allowing corps members to upload files without preprocessing and administrators to export records to Excel or download standardized NIN slips in bulk.

Zinny Food Zone Subscription Platform | Full-Stack Web Application

- Developed a full-stack subscription and slot-management platform for Zinny Food Zone, a food purchasing business serving 800+ customers, digitizing package selection, monthly contributions and annual fulfilment.
- Centralized customer enrollment and contribution tracking, reducing manual coordination across recurring payments and December package fulfilment.

EDUCATION & CERTIFICATIONS

Caleb University | B.Sc. Computer Science

2021 - 2025

Certifications: Responsive Web Design, freeCodeCamp (2025); JavaScript Algorithms and Data Structures, freeCodeCamp (2026)

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, React, Next.js, HTML/CSS, Tailwind CSS, responsive UI development, performance optimization

Backend & Tools: Node.js, NestJS, Express, REST APIs, PostgreSQL, MongoDB, Prisma, Git/GitHub, DigitalOcean, S3/R2
