PROFESSIONAL SUMMARY

Full-Stack Software Engineer with experience building scalable web applications across the MERN stack, delivering robust frontend interfaces and efficient backend services. Skilled in JavaScript, React, Node.js, Express, and MongoDB, with experience developing data-driven applications, RESTful APIs, and maintainable system architecture. Focused on performance optimization, clean code practices, and building reliable solutions that balance technical efficiency with user experience. Passionate about solving real-world problems through modern web technologies while continuously expanding technical depth across software engineering.

WORK EXPERIENCE

eTranzact International PLC-Software Developer Intern

May 2024 - Oct 2024

- Contributed to production web applications in a collaborative team environment
- Worked with Java and Spring Boot to build and maintain application logic
- Collaborated with frontend and backend teams to improve overall system reliability

Freelance Developer

Nov 2025 - Present

- Design and develop responsive web applications for clients using React, Node.js, Express, and MongoDB
- Build frontend interfaces with reusable components, modern state management, and API integrations
- Optimize application performance, maintain code quality, and deploy production-ready solutions

SKILLS

- JavaScript (ES6+) & Full-Stack Application Development
- React & Component-Based Frontend Architecture
- Node.js, Express & RESTful API Development
- MongoDB Schema Design & Data Management
- State Management & API Integration
- Performance Optimization & Responsive Design
- Authentication & Secure Application Workflows
- Clean Code, Debugging & Scalable System Design

EDUCATION

Caleb University-Bachelor of Science,Computer Science

2021 - 2025

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp (2025)
- JavaScript Algorithms and Data Structures — freeCodeCamp (2026)

LANGUAGES

- English — Fluent
